**UNITED STATES SOUND AT THE CORE**

In our editorial comment last week regarding the lynching of the two kidnap murderers no reflection was made against the great American people.

United States is sound at the core and it is safe to say that the real American people will assert themselves and banish racketeers from within their borders.

The movement that a movement is on foot to clean up the country of the criminal element, who due to the depression have been well furnished this last number of years.

The President has announced in no uncertain terms that he will do all and the rest of it must cease.

Those in authority in many cities have come out boldly supporting the President's lead.

In a word, the American people have said to the world here they say: "We have seen this kind of thing done, and it must go." And it will.

**THE BOY SCOUT SCOUTMENT**

When the town council on Monday evening voted a small sum to the local Boy Scout movement they gave the seal of approval to the fact that an organization is almost essential in every town, city and village today, when the spirit of boyhood is on the shoulders of boyant youth.

The training which boys receive when in the Scouts is highly beneficial to them. The boy in a Scout is taught to be mainly, polite, honest and honest. Besides this he is taught first principles and other things most useful.

Boys basically are the same today as they were a generation ago, notably more honest and more considerate than older people may claim. We have heard that "Satan finds mischief for idle hands to do." That is true. Boys who have reached the half-century mark were boys. It is true today, what Satan needs more than anything else is a new direction. From his observation the Scout movement supplies this very well.

When P. Fitzgerald, who spoke for the Scout delegation before the council, voiced the opinion that if all the boys were in the Scouts there would be no way to find them, he said something that all who are acquainted with the Scout movement will appreciate.

The training which a Scout receives under a strict discipline, which is based largely on putting the boy on his mettle, is the best guarantee by the honor of a Scout," he said.

The Scout movement taken on the responsibility of further developing the organization in this district should receive every possible support.

**"BOZO" THE TRIBUNE OFFICE CAR, ENJOYING WELL-EARNED REST**

On Sunday last "Bozo" the faithful Tribune office car (a Ford), was put "out" for the winter after making a tough trip to Grande Prairie on Saturday.

During the summer and fall "Bozo" did a brilliant service. Not once during all the trips did it fail to respond and gave off its best.

The "Bozo" badge was made in a snow storm and took about two hours and a half, which was good time considering the state of the highway and the fact that "Bozo" had to travel over rough roads in a desolate field and then some!

Coming home the trip was not quite so smooth due to the fact that we had no less than two flats.

On the Beaverslodge Hill which is one of the highest points of ice "Bozo" failed to get traction. It was a case of get out and put on the chains.

John Reid, the Tribune office pilot, as he stepped out of the car observed: "The joys of motoring." With chain on the road again "Bozo" was off again on its way for several miles. Then we found that one of the front tires was a flat and the farm industry is at the same time.

"Oh, it was a cold, cold world." Minus a flashlight it was necessary to sit in the dark and wait for the change. The job being completed, we proceeded. When within a few miles of home we found that we had had a slow leak in the "spare" and it decided to go into town. There we found a tire at a quarter to eleven o'clock, frozen.

Lights were still burning in the Wembly Cafeteria and we entered without saying anything to anyone took off our boots and without any

further ado placed what we still had up against the stove. Just that the stove and a good cup of coffee had the desired effect and we felt almost human again.

The next task was to find a man to fix the leak. In this we were successful. Pitched from who were ready to retire, kindred souls, the necessary service. It was very decent of them, as it meant opening windows, a fire, and all the rest of it.

It should be mentioned in passing that we had the pleasure of meeting among others at the cafe, Earl "Shorty" Warren, who knew whereof the necessary service. This was very necessary. The last time he had retired from the law business he was very engaged in writing a story based upon his experience when driving a taxi, and he had written a short chapter of that, which as I remember it, revolves around a romance between a dashing lady and a man who had been a lady in the story. For instance, he made the dangerous curve thus when he made the dangerous curve thus when he made the bridge and the hills.

Here we met a ghost at Swan Lake and put him to bed with much the thrillers of the story. For instance, he made the dangerous curve thus when he made the bridge and the hills.

### HUNTERS LEAVE TO PROTECT SETTLERS ALONG SMOKY RIVER FROM DEER OR MOOSE MENACE

Messrs. Ted Morgan, G. W. Balley, Reece, Deem Wyman and Jim McNaughton left last week for the happy hunting grounds along the banks of the Smoky River with the laudable intention of furnishing the border with deer and moose traps and snares. They claim that these animals are a menace to the settlers of that district, and that they will do their best to give them protection if possible.

An account of their trip will appear in a later issue of The Star.

A \$100 fine or a banch of venison or a round of moose steaks should apply to any of the above mentioned and see if they get it.

Mr. Alec Anderson, Mr. Frank Carpin, Mr. Jack Stevens, Mr. Chas. Parks and Mr. Jim Hardin were appointed as board of directors.

The B. and B. outfit expect to move to the "Lantern" on Friday night.

They will be greatly missed, as they have been an active part in the social affairs of the community during the three months past. The bridge committee, the bridge-keepers—Mr. W. Neilson, Mr. Cliff Shore, and Mr. Jim Hardin—will be missed.

Reports are that Mr. Wm. Keegan is still in Edmonton undergoing treatment.

Mr. John Anne and George Hansen are out at George's business, catching mice, so they say.

Mr. Scott is in the district hospital in a series of services in the Lakes mills. Mr. Hodes seems to be the freight and baggage carrier for all the shipping in and out of the Lakes mills.

Mr. Ed. Harding, Marjorie Harding and Mrs. Campbell made good use of their time, making a series of long-necked calico bags.

On Thursday, November 30, at the home of Mr. and Mrs. Ed Harding, Mr. and Mrs. W. H. Bennett, son and daughter named him, were born. He was named Henry VIII, and he was absolutely convinced that Henry VIII was a lady "killer" all right!

### NORTH KLESKUN

**NORTH KLESKUN, Dec. 2.**—The first party of the season was held at the home of Mr. and Mrs. E. Stienke. Mr. and Mrs. Stienke and their two sons were hosts and host. The big event of the evening was when everyone wore their clothes backwards and an arrival was handed twenty pairs of stockings, each containing a present for the penalties of saying things forward.

The evening was spent in games and contests and gathering peas. Mr. Mr. Harding, Mrs. Marjorie Harding and Mr. and Mrs. Marjorie Harding.

Great is the excitement in the Emmaus district when some of the members of the Emmaus Club go to the Lakes mills. Mr. Hodes seems to be the freight and baggage carrier for all the shipping in and out of the Lakes mills.

Mr. Kirtstein is still in Grande Prairie Municipal Hospital.

### CHALK FALL CREATS ISLAND

Chalk which certain spiders now find homes has been produced in great numbers.

In tests made recently three adults used a long narrow sheet as a seaweed, and a small piece of chalk to that of highly flexible steel. A heavy steel ball dropped from a height of 10 feet did not break the chalk.

Collapses of the cliff was the greatest danger to the island.

At high tide the chalk forms an island 300 feet from the mainland. No one was hurt in the slide.

The most important natural barrier of the best leaf-hopper in California is rainfall.

### LYMBURN

**LYMBURN, Dec. 5.**—A dance was held in Lymburn Hall to collect funds for the Christmas tree for Lambert school. Everybody reported a good time and the money raised was \$100. Two cakes were drawn for during the supper period and after the dance the lucky winners of the winning tickets.

Lambert school Christmas concert will be held in Lymburn Hall on December 22. Keep the date free.

Mr. Newton, the lumberman, has a new sawmill at Lymburn. This day receiving applications for patents.

Mr. Balfour, school inspector, visited Lymburn on Saturday morning. Lymburn pupils were quaking all day Thursday, but so far he hasn't arrived here.

Mrs. George Pollock visited Hythe Monday and stayed overnight.

Mr. Arnold brought his bride to the dance on Saturday evening.

We were all glad to meet you, Mrs. Arnold, and wish you every happiness in your new home.

### DEBOLT ITEMS

**DEBOLT, Dec. 1.**—About 50 were present at the club dance last Saturday evening, and to the consternation of the roads the Highway orchestra could not get there.

Mr. Ivan McGehee, little son

and visitors in Grande Prairie.

Mrs. J. Fehr and Mrs. L. Brooks are visiting in Grande Prairie.

Miss Hattie Warren was a dinner guest at the Albert Mattocks home on Sunday.

On Saturday evening Mr. Ivan McGehee entertained at home. Those in attendance were Mr. and Mrs. McGehee, Mr. Ellis Turner, Mr. and Mrs. Tom Broomefield, a dandy lunch was served by the host, consisting of two kinds of cold cuts, cheese and bread.

Everyone is busy dipping water out

of their cellar since the recent rains.

The Gilwood school pupils are busy

making rings for the Christmas concert and dancing at the school.

They are very icy at the school.

The Stewart-Breamish threshing outfit is now at the farm of Wm. Chomcerky on farm on Friday and moved to the Wm. Stewart farm.

They are progressing rapidly.

After the conductor had a friendly chat with several of the prominent citizens at the station, he thought he might be able to get a ride to Weyburn and see what was happening there.

The train had got nicely under way,

when Charlie evidently changed his mind, had forgotten the license, or something, and had to stop.

After the conversation with the conductor, he—the conductor—obligingly pulled the conductor's chain and the train started again.

Charlie and his friend had a nice siderail walk back.

This is the last call for the Sexsmith hockey boys' dance, to be held at the "Lantern" on Friday evening, December 8.

We understand that there will be several new novelties introduced during the course of the dance, and the sale of tickets to a large crowd is expected. Mrs. Innes being the lucky member.

### HIGH PRAIRIE

**HIGH PRAIRIE, Dec. 1.**—The ice in both the skating rink and the curling rink is in excellent condition and is well suited to use within the next few days, providing the weather permits.

INVENTED ANTI-AIRCRAFT GUN

Polish Prisoner Escaped Death Sentence In Imprisoning War Officials

Sentenced to death in prison in Warsaw, Poland, a man has been saved from execution so that War Crimes Commission can get information on anti-aircraft gun. The day before he was to be executed he managed to write a prison letter to an interest war official in a model of his device. They recognized the value of the weapon, which is expected to revolutionize air defense, and are keeping the details secret.

## Blunt Noses Make Best Streamlines

(Above) New cars all-metal bodies have the speed ring or shield around the short, blunt nose which cuts down the "air-drag."

(Above) Model of auto for 1934 showing aero-dynamic streamlining. The body is built on a complete weight redistribution. Passengers sit between the axles not over them.

(Above) Navies too are going in for streamlining and blunt noses. The new aircraft carriers, incorporating sensational new engineering advances.

(Right) Of all fast moving objects streamlined by nature with the exception of sharks, none is so swift as the shark, which tapers toward the rear with less resistance than any other shape.

For centuries people have noticed that sharp pointed moving objects would clean the air and most any other shape. A broad water with less resistance than a front, which tapers toward the rear—the natural shape of the shark is called "tapered" which creates the least resistance. Nature no one bothered to experiment to ascertain scientifically if this were true.

To the amazement of the first experimenter, it was discovered that his own transportation problems.

## ENRICO TOBACCO GROWERS

Several parts of the British Empire are capable of producing leaf tobacco in quantity. In the rest of the dominion only countries which export it to any considerable extent are Canada, Australia, New Zealand and South Africa. The two former colonies are being much the older producers.

## CANADIAN FOREST OWNERSHIP

It may be said that 90.4 per cent of Canada's forest area is still owned by individuals or corporations. The dominion only to certain temporary privilages as regards timber harvesting, and any time he placed under forest management and dedicated to forest production.

## Practical Talks About Hogs Attentively Listened to in Block and Alberta Points

BEAVERLodge, Dec. 5.—Battling roads and weather. Major G. W. Thompson, Dominion Live Stock Commissioner, Calgary, addressed a very successful series of meetings in the Peace River district, extending over twelve years ago, and reaching territory hitherto uninvited by him. The series was conducted by W. D. Albrecht, superintendent of the Experimental Station, and W. J. Thompson, district agriculturist, at Grande Prairie, and James Travis, district extension agent, the latter three being members of the British Columbia Department of Agriculture. Major Albrecht accompanied the Major in his tour, and Mr. Travis also doing so in their absence. The meetings were well attended, and the appointments were in response to special invitations. They were widely attended, with heavy, slippery roads the average retiring hour for the speakers proved to be about 3 a.m. on one occasion when they had to sit at six o'clock in the morning.

Though the experiments scantly rewarded the speaker, the results produced by rain and mud, the eight meetings in British Columbia averaged 40 attendees and with numerous quiet hours were well worth the long and arduous duration of about 3½ hours. Four meetings in Alberta averaged 57 attendees, and Major George M. Freshen was slated to perform solo at High Prairie and East Peace River, but the heavy snows made his visit impractical and expensive for the others to accompany him to those points.

Freshen was slated to perform solo at High Prairie and East Peace River, but the heavy snows made his visit impractical and expensive for the others to accompany him to those points.

The third lesson was that it should lead men to value the things which money cannot buy, health, wisdom, knowledge, the capacity to work, the pleasure of the sunset and the laughter and prattle of a little child—a conscience健全，and the love of God and his creation. "These are some of the many things that money cannot buy," said H. L. Lambeth.

The fourth lesson was that it should lead men to value the things which money cannot buy, health, wisdom, knowledge, the capacity to work, the pleasure of the sunset and the laughter and prattle of a little child—a conscience健全，and the love of God and his creation. expected at the assembling points they are moved into refrigerator cars, which go from place to place picking up lots until full. The birds are then sent to market in the ship's side at a date when we land them in London, England, about ten days or a week before Christmas.

Only birds of high quality—grades "A" and "B"—are to be exported, and the quality depends upon the care taken in handling the birds when taken from cold storage has been overcome. Canadian scientists have proved that by passing the birds through a conditioning chamber, the birds attain a perfect condition. This process will be used for the present shipment. As soon as the birds are packed, they pass through this chamber, which in space of a few minutes raises their temperature to that found in the outside air. When it comes to shipping, the preserv activities also point to a fairly extensive movement.
